70125	Single Black handle control
70223	Twin Red handle control
70239	Twin Red + Black handle control
70240	Twin Black handle control
70310	V4 cable adaptor kit

Key Features

- The IM series controls are single function top mounted units designed to operate in both Marine & Industrial environments. These robust controls are available in many configurations to meet the varying shift and throttle requirements of our customers.
- To apply the throttle simply twist the red control handle to apply the internal brake mechanism and fix the handle in place. The shift will lock into three defined built in positions in the black handle.
- Available in 5 control configurations
- Simple twist to lock red handle
- Three detented positions for black handle
- Suits Version 3 and Version 4 control cables or competitors 3/16" & 1/4" threaded cables
- Direct mount into competitors footprint
